Clippers

Correct body positioning

Cross check

Guard attachments

Haircutting shears

Horseshoe parting

Moving guideline

Taper

Thinning shears

Trimmers

Wide tooth comb

1. An even blended haircut from very short at the hairline to longer lengths as you move up the head.
2. Cutting technique, where the clippers move sideways across the comb rather than bottom to top.
3. A parting that starts about two inches below the apex of the head, beginning and ending at the front hairline.
4. Guideline that moves as the haircutting progresses, used often when creating layers or graduation.
5. Taking a panel of hair opposite then original cutting angle and checking for consistency.
6. Rolling your shoulder back and standing directly (parallel) in front of the section on which you are working.
7. Electrical device that cuts the hair using two moving blades held in place by a metal plate with teeth.
8. A smaller sized clipper, usually cordless, used to clean necklines and around ears.
9. When attached to clippers, these allow you to cut the hair evenly to the exact length.
10. Used mainly for removing length and detailing the haircut.

Name _____ Period _____ Date _____

11. These tools are great for removing excess bulk and for blending one area with another.
12. Finer-spaced teeth used for detailing, shears over-comb, and clipper over-comb techniques.
13. Tool used when cutting thicker and longer lengths, where detailing is not required.
