

Bulletin Board Project

Directions: Visit the Texas Essential Knowledge and Skills webpage at:
<http://www.tea.state.tx.us/index2.aspx?id=6148>

You will be developing one bulletin board at each level:

- elementary level
- middle school level
- high school level

Select a TEK and student expectations of your choice for each level and construct three different bulletin boards. Projects will be graded using the Bulletin Board Project Rubric. Each bulletin board must display the following:

- Attractiveness
- Functionality
- Age and content appropriate
- Visually engaging

When constructing the board, ask yourself the following questions:

- What purpose will my board serve?
- What do I want my students to learn or gain from it?
- How will I use it in the classroom?

Teacher may allow students to present the bulletin board to the class, if time permits.
