

Dealing with a Crisis Brochure

With partners, research a crisis. Include the following information:

- causes and/or symptoms of the crisis
- coping with the crisis
- effects on family members
- strategies to effectively manage the crisis and/or technology available to meet special needs of family members
- resources, laws and policies available to help cope with the crisis

Develop a brochure to include the necessary information. The brochures can be completed either by hand on construction paper using drawings or magazine clippings for pictures or on a computer using the brochure maker.

You will make an oral presentation of your brochure to the class.

You will be assessed by "Rubric for Brochure and Presentation".

Use the spaces below to help you organize your information for your brochure.
