

Review and Roll

In groups of four, write a lesson-based question on each panel of the cube. Cut the template out along the outside lines. Crease all lines on the cube template. Glue the shaded tabs to construct the cube.

When instructed to do so, pass your cube to another group. They will roll the cube and answer a lesson-based question that lands on the top. Each member will take turns rolling the cube and answering questions. The cubes may be rotated among all groups if time allows.
